Texas Economic Stabilization Investment Fund

The Texas Economic Stabilization Investment Fund ('the Fund') was created by Section 404.0241 of the Government Code to invest a portion of the Economic Stabilization Fund (ESF) balance for a slightly higher return than the state's operating fund. The Fund has two primary performance objectives: 1) maintaining purchasing power; and 2) delivering returns in excess

of short-term cash equivalents. Maintaining the Fund's purchasing power means achieving net returns over a full market cycle (3-6 years) that exceed inflation. Inflation will be measured using the annualized growth rate of the national Consumer Price Index – Urban (CPI-U) published by the Federal Bureau of Labor Statistics.
